\$10,000 - \$25,000	8.63
\$5,000 - \$10,000	0.73

Investment risks

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund. The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

Investment in company shares: The fund invests in shares of companies, and the value of these shares can be negatively affected by changes in the company, its industry or the economy in which it operates.

Geographical focus: This fund invests primarily in the United States, which means that it is more sensitive to local economic, market, political or regulatory events in the United States, and will be more affected by these events than other funds that invest in a broader range of regions.

Concentrated fund: The fund invests in fewer companies than other funds which invest in shares usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual company has significant losses.

Fund operations: The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

Class currency: The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

A temporary negative cash position may be due to (1) unsettled trade activity (2) permitted purposes, such as borrowing or derivatives use, if allowed by the prospectus.

Definitions

Risk and reward profile: There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund. The lowest category does not mean a risk-free investment. The fund does not offer any capital guarantee or protection.

Sharpe ratio: A risk-adjusted measure, calculated using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk-adjusted performance. **Treynor ratio:** Measure of risk-adjusted portfolio performance where Beta acts as a proxy for the level of risk associated with a given portfolio. **Tracking error:** Dispersal of differences between the returns obtained by the fund and the benchmark variation. **Information ratio:** The ratio of annualized expected residual return to residual risk. **Risk-adjusted alpha:** Measures the difference between a fund's actual returns and its expected performance, given its level of risk as measured by Beta. **Beta:** Measures the sensitivity of the fund to the movements of its benchmark. **R-squared:** Measures the strength of the linear relationship between the fund and its benchmark. R-squared at 1.00 implies perfect linear relationship and zero implies no relationship exists. **M-squared:** A measure of portfolio risk, the Modigliani ratio serves to adjust for the risk that a given portfolio takes in excess of the risk-free rate. **Standard deviation:** Measures the risk or volatility of an investment's return over a particular time period; the greater the number, the greater the risk.

Important information

THIS INFORMATION IS ONLY FOR USE BY PROFESSIONAL CLIENTS, ELIGIBLE COUNTERPARTIES OR QUALIFIED INVESTORS. IT IS NOT AIMED AT, OR FOR USE BY, RETAIL CLIENTS.

This is a sub-fund of Legg Mason Global Funds plc ("LMGF plc"). LMGF is an open-ended investment company with variable capital, organised as an undertaking for collective investment in transferable securities ("UCITS"). LMGF is authorised in Ireland by the Central Bank of Ireland.
